

Tablelands Branch Surveys

LandTeam's Tablelands Branch Surveyors have been working closely with the Upper Lachlan Council Road Network Upgrading Department in achieving their outcomes.

In July the Tableland's Surveyors conducted a detail survey on the Abercrombie River for bridge replacement on the Tablelands Way.

The survey required Surveyors to detail the road approaching the bridge in both directions and included detail surveys of the river 100 metres up and down stream - a challenging task mid-winter with near freezing water temperatures.

Earlier in the year Upper Lachlan Council contracted LandTeam Surveyors to carry out road boundary and detail surveys on the Junction Point Road north of Crookwell. The survey involved surveying ten kilometres of dirt road broken up into three sections of work and required the resources of many survey crews with LandTeam's Highlands Branch Surveyors lending a hand on one of the Sections.
