

**Ravensworth Heights Estate -  
A large residential subdivision  
development at Goulburn surveyed and  
engineered by LandTeam.**

The Ravensworth Heights Estate is a residential development by **AV JENNINGS** which is located in the Marys Mount land release area in Goulburn.

LandTeam are providing surveying, engineering and project management services to AV Jennings for the rollout of over 200 new residential lots and associated housing. LandTeam have worked closely with AV Jennings and **GOULBURN MULWAREE COUNCIL** to plan and roll-out the subdivision and integrated housing in such a way as to allow the construction of suitable house and land packages to suit the requirements of home buyers in the area. Varying lot sizes and house styles are included within the development.

LandTeam have been responsible for the installation of all roads, drainage and infrastructure within the development including the installation of optic fibre by the **NATIONAL BROADBAND NETWORK** to service the majority of dwellings within the development (a first for Goulburn).

LandTeam are well placed to manage the survey and civil engineering responsibilities of this project as they had been involved with the development of approximately 300 lots in the Marys Mount area prior to undertaking the AV Jennings work.
