

Chapel Hill Residential Estate Jamberoo Village

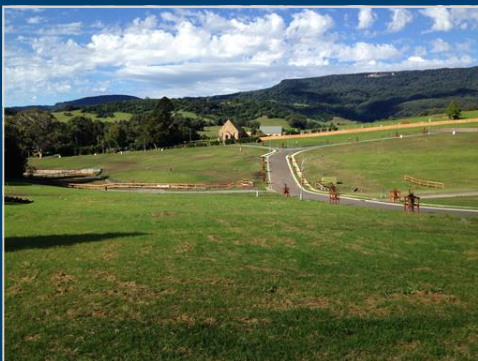

LandTeam Town Planners, Surveyors and Civil Engineers have recently finalised consulting works on Jamberoo's Chapel Hill residential estate - the development was project managed by the Fountaindale Group.

The residential estate comprises thirty two lots set in the historic village surrounded by rolling countryside, a rustic lane and a heritage listed church.

The northern vehicular and pedestrian entry to the subdivision focuses the attention of the individual onto a vista prominent with the historical church and cemetery area on the hillside to the south.

The subdivision civil design incorporated a floodway into water quality ponds through the centre of the site and LandTeam's surveying section has completed preparation of the work-as-executed plans and the cadastral subdivision plan.

If you are in Jamberoo find some time to enter O'Mara Place from the north and check out the vista across the valley to the historical church impressive!!
